

Incentives to Property Owners that Allow for Public Recreational Trails

The citizens of Northwest Wisconsin request:

Support legislation that provides incentives to property owners that allow for public recreational trails on their property.

Background:

- Tourism is critical to the economy in NW Wisconsin.
- Recreational trails are very important to the NW Wisconsin Tourism Industry.
- Northwest Wisconsin has lost hundreds of miles of trail on private property over the past five years.
- As private lands are lost, trails move to road rights of way that are less appealing and more hazardous.

Proposal: Superior Days Delegates propose legislation that will help create incentives for long lasting recreational trail easements across private properties.
